

BOMA takes care of you and the planet

OUR ENVIRONMENTAL CHARTER

BOMA is a lifestyle hotel, a place where you can get away from it all and recharge your batteries. More than ever, we take care of our guests, our employees and the planet.

Since our opening in 2017, respect for the environment has been of paramount importance to us. For us, for you and for future generations, we do everything we can to minimize the impact of our activity on the ever-changing environment.

WE RAISE AWARENESS AMONG OUR TEAMS AND CUSTOMERS

Our teams' commitment to environmental protection and sustainable development is essential. It is reflected through daily actions, shared across all of our departments, which enable us to change everyone's practices in order to limit their environmental impact. It also means inviting our guests to take part in our action through simple gestures that help protect our planet.

- Our teams are trained in eco-gestures to be respected in their daily tasks ;
- Our teams encourage our guests to adopt eco-friendly practices ;
- Our teams choose our service providers and suppliers on the basis of their sustainable, social and mainly local commitments ;
- Our teams offer our guests numerous alternatives to limit car travel: bike hire, public transport, etc. ;
- Our teams are trained in eco-responsible digital practices (lessen the printing of documents, using computer standby mode, etc.) ;
- We encourage the use of bicycles and public transport for commuting: over 90% of our employees use bicycles, walking and public transport to get to work.

WE SAVE WATER

Due to population growth, economic development and other challenges affecting natural resources, water has become a precious commodity. To prevent the depletion of this resource, we are committed to reducing water consumption throughout our hotel.

- We have installed water economizers/pressure reducers on taps and showers ;
- Our toilets are equipped with volumetric flushes ;
- We read our water meters every month to better manage our consumption and have set up a table to monitor our consumption ;
- We carefully monitor our equipments to detect and repair any leaks that may occur ;
- We change guests' sheets and towels only on request.

WE SAVE ENERGY

Today, controlling our energy consumption is a daily challenge that our establishment is determined to meet. Simple gestures are renewed and adapted, and new technological equipment is put in place to achieve our objectives, especially to reduce our greenhouse gas emissions.

- We read our energy meters (electricity and gas) every month to better manage our consumption, and have set up a table to monitor our consumption ;
- We have equipped our hotel with LED or low-energy light bulbs, which account for 95% of our lighting. This saves energy and provides similar comfort for our guests ;
- We have installed presence detectors in certain common areas and technical spaces to limit energy wastage ;
- We optimize lighting periods (day/night), in particular the lighting of our facade and signage, thanks to automatic sensors ;
- We control heating, ventilation and air-conditioning: during the heating season, we reduce ambient heating temperatures, thanks to our 2017 gas condensation boilers equipped with automatic controls; during the summer, we limit air-conditioning temperatures ;
- Our windows are double-glazed.

WE LIMIT AND SORT WASTE

Separate waste and preventing food waste are objectives that, from now on, must be part of everyone's daily routine. That's why, at our level, we have set up a waste sorting and recycling system, as well as a policy to prevent food waste.

- Whenever possible, we work with bulk or large-pack products to limit unnecessary packaging ;
- Our Chef has a rigorous stock management policy, carries out a monthly inventory of dry grocery products and offers a short but varied menu, working with products in their entirety ;
- We give a second life to uneaten foods such as pastries, turning them into breadcrumbs or delicious puddings ;
- Our separated waste and bio-waste is collected and recycled by our service provider ;
- We have also set up a sorting point of waste for our guests ;
- Our hospitality products are packaged in large formats such as dispensers or pump formats. Our soaps are not thrown away; they are recycled by disabled people, via our partner SAPOCYCLE, to improve the sanitary conditions of families in need.

WE CARE ABOUT OUR CUSTOMERS' WELL-BEING

The well-being of our guests is one of our top priorities. This concern is reflected by following a responsible and sustainable purchasing policy in which we involve our service providers and suppliers. We foster the purchase of eco-labeled products or local products that respect the environment for both our restaurant and our rooms :

Food :

- Dishes in our establishment are prepared with seasonal products, preferably local, organic or label products, many of which come from short circuits ;
- We adapt to special diets (vegetarian, vegan, lactose-free, gluten-free, etc.) by proposing suitable dishes ;
- Our restaurant menus feature organic and/or fair-trade products such as bread, yoghurts, tea, certain fruit juices and wines...

Cleaning :

- The products used to clean rooms and common areas are eco-labeled, offering better air quality and fewer health risks; our staff also use steam cleaning to clean surfaces (tiles, windows...).

But also :

- We have chosen for our guests Simmons mattresses created for the hotel, HEFEL comforters in Tencel (a natural and ecological fiber) and DODO plant-based pillows with shape memory...

AND MUCH MORE...

- Our establishment is completely non-smoking ;
- We are currently carrying out a carbon audit to measure and reduce our carbon footprint ;
- We are auditing our heating, ventilation and air-conditioning system to optimize it and reduce energy consumption ;
- We have set up a partnership with Solikend, a social economy company, which enables us to support environmental protection associations such as Surfrider, which works to protect the ocean and coastline; Water Family, which works to preserve water and health, and Planète Urgence, which also works to protect the environment..

THANK YOU FOR SUPPORTING US DURING YOUR STAY!

To give concrete expression to our commitment to continuous improvement,
we are in the process of obtaining the Clef Verte label.

*The Clef Verte label distinguishes tourist accommodation and restaurants committed to a voluntary,
effective and dynamic environmental approach. The label is awarded annually by a jury.*
