

BOMA takes care of you and the planet

OUR ENVIRONMENTAL CHARTER

Dear Sir/Madam,

We are delighted to welcome you to our BOMA Easy Living Hotel****!

BOMA is a lifestyle hotel, a place for a change of scenery and resources that advocates benevolence and sharing.

BOMA takes care of its customers, its employees and the planet.

Since 2017, when the hotel was founded, respect for the environment has been at the heart of our approach.

And because our environment is constantly evolving, we are attentive to change.

For us, for you and for future generations, we do everything we can to minimize the impact of our activity on the environment.

WE RAISE AWARENESS AMONG OUR TEAMS AND CUSTOMERS

Our teams' commitment to environmental protection and sustainable development is essential. It takes the form of daily actions, shared by all our departments, which enable us to change everyone's practices in order to limit their environmental impact. It also means inviting our customers to take part in our action through simple gestures that help protect our planet.

Our teams :

- are trained in eco-gestures to be followed in their daily tasks ;
- invite our customers to adopt ecogestures too ;
- choose our service providers and suppliers on the basis of their sustainable, social and, above all, local commitments ;
- offer our customers a wide range of alternatives to limit car travel: bike hire, public transport... ;
- are trained in eco-responsible digital practices (limiting document printing, using computer standby mode, etc.) ;
- encourage the use of bicycles and public transport for commuting: over 90% of our employees use bicycles, walking and public transport to get to work.

WE SAVE WATER

Due to population growth, economic development and other challenges affecting natural resources, water has become a precious commodity. To prevent the depletion of this resource, we are committed to reducing water consumption throughout our hotel.

- We have installed water savers/pressure reducers on taps and showers ;
- Our toilets are equipped with volumetric flush systems ;
- We read our water meters every month to better manage our consumption and have set up a table to monitor our consumption ;
- We carefully monitor our equipment to detect and repair any leaks that may occur ;
- We change bed linen and towels on request only.

WE SAVE ENERGY

Today, controlling our energy consumption is a daily challenge that our establishment is determined to meet. Simple gestures are renewed and adapted, and new technological equipment is put in place to achieve our objectives, in particular to reduce our greenhouse gas emissions.

- We read our energy meters (electricity and gas) every month to better manage our consumption, and have set up a table to monitor our consumption ;
- We have replaced our light bulbs with LED or low-energy bulbs, and have already fitted over 95% of our lighting, which means energy savings and a similar level of comfort for our customers ;
- We have installed presence detectors in some common areas and in technical areas to limit energy wastage ;
- We optimize lighting periods (day/night), in particular the lighting of our facade and signage, thanks to automatic sensors ;
- We control heating, ventilation and air-conditioning: during the heating season, we reduce ambient heating temperatures, thanks to our 2017 gas condensing boilers equipped with automatic controls; during the summer, we limit air-conditioning temperatures ;
- Our windows are double-glazed.

WE LIMIT AND SORT WASTE

Sorting our waste and preventing food waste are objectives that, from now on, must be part of everyone's daily routine. That's why, at our level, we have set up a waste sorting and recycling system, as well as a policy to prevent food waste.

- Whenever possible, we work with bulk or large-pack products to limit unnecessary packaging ;
- Our Chef has a rigorous stock management policy, carrying out a monthly inventory of dry groceries, offering a short but varied menu and limiting buffets to breakfasts only. What's more, all uneaten breakfast pastries and breads are "recycled" to make delicious puddings and breadcrumbs ;
- We sort our waste and bio-waste is collected and recycled by our service provider ;
- We have also set up a selective sorting point for our customers ;
- Our hospitality products are packaged in large formats such as dispensers or pump formats. Our soaps are not thrown away and are recycled by disabled people, via our partner SAPOCYCLE, to improve the sanitary conditions of families in need.

WE CARE ABOUT OUR CUSTOMERS' WELL-BEING

The well-being of our customers is one of our top priorities. This concern translates into responsible purchasing and a sustainable purchasing policy in which we involve our service providers and suppliers. We prefer to buy eco-labelled products or local products that respect the environment, both for our restaurant and our rooms :

Food :

- Our dishes are prepared with seasonal products, preferably local, organic or labelled, many of which come from short circuits ;
- We adapt to special diets (vegetarian, vegan, lactose-free, gluten-free...) by proposing adapted dishes ;
- Our restaurant menus feature organic and/or local products such as bread, yoghurts, vegetables, cheese, tea, some fruit juices and wines...

Cleaning :

- The products used to clean our rooms and common areas are eco-labelled, which means better air quality and fewer health risks. Our staff also use steam cleaning to clean surfaces such as tiles and windows.

But also :

We have chosen for our customers Simmons mattresses created for the hotel, HEFEL comforters in Tencel (a natural, ecological fiber), DODO memory foam pillows...

AND MORE...

- Our establishment is completely non-smoking ;
- We commissioned a carbon audit to measure and reduce our carbon footprint ;
- We audit our heating, ventilation and air conditioning system to optimize it and reduce energy consumption ;
- We have set up a partnership with Solikend, a social economy company, which supports environmental protection associations ;
- We have planted aromatic herbs on our 2nd floor terrace, which Yorick, our chef, uses every day in his kitchen ;
- We offer Aqua Chiara micro-filtered water in our restaurant.

THANK YOU FOR SUPPORTING US DURING YOUR STAY. !

We have held the **Clef Verte label** since 2024

The Clef Verte label distinguishes tourist accommodation and restaurants committed to a voluntary, effective and dynamic environmental approach. The label is awarded annually by an independent jury of tourism and environmental experts and professionals.
